Disclosures

I have the following relevant financial relationship with a commercial interest to disclose:

I receive salary from the Project TEACH grant
Learning Objectives

• To review how to assess for anxiety disorders in children and adolescents in a primary care setting.

• To discuss and practice using a tool which can assist in the assessment and monitoring response to treatment of childhood anxiety disorders.
Agenda

• Review clinical pearls on assessing anxiety in pediatric primary care

• Review a vignette of an anxious child

• Review anxiety screening tool: the SCARED
Anxiety Disorders per DSM5

• Generalized Anxiety Disorder
• Separation Anxiety Disorder
• Social Anxiety Disorder
• Panic Disorder
Anxiety Provoking Hodge-Podge

• School Avoidance
• Selective Mutism
• Specific Phobia
• Agoraphobia
Epidemiology

• Very common disorder among your patient population.

• Prevalence of up to 20% of all children and adolescents, likely more now.
Anxiety Disorders

• Common Presenting Symptoms:
  • Recurring and/or increasing fears and worries about routine parts of everyday life
  • Physical complaints, like stomachache or headache
  • Trouble concentrating
  • Trouble sleeping
  • Fear of social situations
  • Fear of leaving home
  • Fear of separation from a loved one
  • Refusing to go to school
Anxiety Throughout Development
## Developmental Considerations

The Anxiety Toolkit

• S:
  • Interview the Youth Alone, as well as with parents – kids often protect parents from their pain.
    • “COLDER”
    • Trauma
    • Mental health “look-a-likes”
    • Family History

• O:
  • Physical Exam to consider medical “look-a-likes”
  • Screening Tools on our website: SCARED or GAD7.
Evaluation

• Consider differential diagnosis of medical conditions that may mimic anxiety symptoms:
  • Hyperthyroidism
  • Caffeinism
  • Migraine
  • Asthma
  • Seizure disorders
Less Common Medical Causes

- PANDAS (Pediatric autoimmune neuropsychiatric disorders associated with strep infections)
- Lead intoxication
- Even Less Common:
  - Hypoglycemia
  - Pheochromocytoma
  - CNS disorder (delirium or brain tumor)
  - Cardiac arrhythmias
Evaluation

• Consider differential diagnosis of other psychiatric disorders that may mimic anxiety symptoms:
  • ADHD (restlessness, inattention)
  • Autism Spectrum Disorders (social deficits, communication deficits, repetitive/rigid behaviors)
  • LD (worries about school performance)
  • Depression (poor concentration, sleep difficulty, somatic complaints)
Less Common Psychiatric Causes

- Psychotic disorders (restlessness and/or social withdrawal)
- Bipolar (restlessness, irritability, insomnia)
Other Considerations

• Substance use- CRAFFT on website
• Adjustment disorder
• Abuse/Unsafe environment/Bullying
• Pregnancy
• Drug Side Effects
  • Prescription- asthma, mood, rheum/allergies
  • Nonprescription- diet, allergies, colds
Assessment

• Review relevant history (“COLDER,” PMH, medications, psychiatric family history)
• Assess function (sleep, appetite, school performance)
• Screen for safety (neglect/abuse/SI)
• Consider other medical, additional mental health assessments (depression, ADHD)
• MH Screening Tools: SCARED
A Vignette: Katie

• Katie is a ten year old girl in 5th grade
• History of stomach aches and headaches, missing school
• Has seen gastroenterologist
• Recent ED visit for headaches: CT normal
• Dad wants neurology referral
The SCARED Screener

• Two versions: Child and Parent
• Horizontal domain: 41 symptoms
• Vertical domain: Frequency of Symptoms
  • Not true: 0
  • Sometimes true: 1
  • Very often true: 2
• Total score cut-point: 25
Screen for Child Anxiety Related Disorders (SCARED)
Child Version—Pg. 1 of 2 (To be filled out by the CHILD)

Name:

Date:

Directions:
Below is a list of sentences that describe how people feel. Read each phrase and decide if it is “Not True or Hardly Ever True” or “Somewhat True or Sometimes True” or “Very True or Often True” for you. Then for each sentence, fill in one circle that corresponds to the response that seems to describe you for the last 3 months.

1. When I feel frightened, it is hard to breathe.
2. I get headaches when I am at school.
3. I don’t like to be with people I don’t know well.
4. I get scared if I sleep away from home.
5. I worry about other people liking me.
6. When I get frightened, I feel like passing out.
7. I am nervous.
8. I follow my mother or father wherever they go.
9. People tell me that I look nervous.
10. I feel nervous with people I don’t know well.
11. I get stomachaches at school.
12. When I get frightened, I feel like I am going crazy.
13. I worry about sleeping alone.
14. I worry about being as good as other kids.
15. When I get frightened, I feel like things are not real.
16. I have nightmares about something bad happening to my parents.
17. I worry about going to school.
18. When I get frightened, my heart beats fast.
19. I get shaky.
20. I have nightmares about something bad happening to me.

SCORING:
A total score of ≥ 25 may indicate the presence of an Anxiety Disorder. Scores higher than 30 are more specific.
A score of 7 for items 1, 6, 9, 12, 15, 18, 19, 22, 24, 27, 30, 34, 35 may indicate Panic Disorder or Significant Somatic Symptoms.
A score of 9 for items 3, 7, 14, 21, 23, 28, 33, 35, 37 may indicate Generalized Anxiety Disorder.
A score of 5 for items 4, 8, 13, 16, 20, 25, 29, 31 may indicate Separation Anxiety Disorder.
A score of 8 for items 3, 10, 26, 32, 39, 40, 41 may indicate Social Anxiety Disorder.
A score of 3 for items 2, 11, 17, 18, 26, 29, 36 may indicate Significant School Avoidance.

*For children ages 8 to 17, it is recommended that the clinician explains all questions, or have the child answer the questionnaire sitting with an adult in case they have any questions.

Developed by Diana Birmaher, M.D., Sunetsa Khetrapal, M.D., Marlene Coyle, M.Ed., David Brent M.D., and Sandra McKenzie, Ph.D., Western Psychiatric Institute and Clinic, University of Pittsburgh. E-mail: birmaher05@upmc.edu
Summary

• Reviewed how to assess anxiety in pediatric primary care.

• Reviewed a vignette on an anxious child.

• Discussed the use of the SCARED, an anxiety screening and monitoring tool.
